|                                                            |               |
|------------------------------------------------------------|---------------|
| • <b>Trestbps (Blood Pressure):</b>                        | 180           |
| • <b>Chol (Cholesterol):</b>                               | 320           |
| • <b>Fbs (Fasting Blood Sugar):</b>                        | 1 (High)      |
| • <b>Restecg (Resting Electrocardiographic Results):</b>   | 1 (Normal)    |
| • <b>Thalach (Max Heart Rate):</b>                         | 120           |
| • <b>Exang (Exercise Induced Angina):</b>                  | 1 (Yes)       |
| • <b>Oldpeak (Depression Induced by Exercise):</b>         | 4.0           |
| • <b>CP_1 (Chest Pain Type 1):</b>                         | 0             |
| • <b>CP_2 (Chest Pain Type 2):</b>                         | 1             |
| • <b>CP_3 (Chest Pain Type 3):</b>                         | 0             |
| • <b>Thal_2:</b>                                           | 0 (Abnormal)  |
| • <b>Thal_3:</b>                                           | 1 (Normal)    |
| • <b>Thal_4:</b>                                           | 0 (Normal)    |
| • <b>Slope_1 (Slope of Peak Exercise ST Segment):</b>      | 1 (Upsloping) |
| • <b>Slope_2:</b>                                          | 0 (Flat)      |
| • <b>Hemoglobin (Hb):</b>                                  | 9.8           |
| • <b>MCH (Mean Corpuscular Hemoglobin):</b>                | 27.0          |
| • <b>MCHC (Mean Corpuscular Hemoglobin Concentration):</b> | 29.5          |
| • <b>RDW (Red Cell Distribution Width):</b>                | 15.8          |
| • <b>RBC Count:</b>                                        | 3.9           |
| • <b>Pregnancies:</b>                                      | 2             |
| • <b>Glucose:</b>                                          | 225           |
| • <b>Blood Pressure:</b>                                   | 110           |
| • <b>Skin Thickness:</b>                                   | 50            |
| • <b>Insulin:</b>                                          | 300           |
| • <b>BMI:</b>                                              | 37.5          |
| • <b>Diabetes Pedigree Function:</b>                       | 1.12          |
| • <b>Age:</b>                                              | 70            |
| • <b>Hemoglobin:</b>                                       | 9.8           |
| • <b>MCH:</b>                                              | 27.0          |
| • <b>MCHC:</b>                                             | 29.5          |
| • <b>MCV (Mean Corpuscular Volume):</b>                    | 78.5          |
